DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-39 and 50-59, are drawn to a wetness monitoring system and the method of detecting wetness, classified in class 604, subclass 361.
- II. Claims 40-49, are drawn to a method of tracking the number of times a wetness sensor is reused, classified in class 128, subclass 886.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions, invention I is an apparatus and method for detecting wetness whereas invention II is a method for keeping track of how many times a sensor is being used.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

NOTE: Applicant's election without traverse of claims 1-39 and 50-59 in the reply filed on 21 April 2004 is acknowledged.

NOTE: If Applicant elects Invention I, then Applicant must also elect one of the following patentably distinct species of the claimed invention:

1. Species 1 is drawn to a wetness monitoring apparatus with a sensor, a data collector with a communication device and power source, and a control station, and a method of detecting wetness (claims 1-30).
2. Species 2 is drawn to a wetness monitoring apparatus with a sensor and a data collector with memory (claims 31-39).
3. Species 3 is drawn to a wetness monitoring apparatus with a sensor, a data collector having a housing that holds an electric circuit with contacts, a fastener, and a locking mechanism (claims 50-59).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Mr. Sokol on 1 July 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
